

# Internship as a Full-stack Developer

**Become an intern as a full-stack developer at Bliksund and contribute to developing solutions that make a difference in the real world. Be part of helping those who help.**

Are you passionate about programming, coding and developing digital solutions? And do you dream of a future in either front-end or back-end development? Now you have the opportunity for an internship as a developer in our development team in Thisted.

We are a SaaS company developing digital solutions for Danish and international emergency services. We are driven by a great passion and interest in all things digital. We have offices in Denmark, Norway, Holland, and Vietnam, selling our digital solutions worldwide.

We work with web development, system integrations, maintenance and operation of systems and websites, UX/UI web design, and more. The internship as a full-stack developer is a great opportunity for those interested in a career in either front-end or back-end development.

## **About you:**

We imagine that you are a student or have recently completed education in areas such as web development, computer science, computer technology, IT technician, programmer, or other relevant fields. As a person, you are a rational thinker, hardworking, and a good team player. At the same time, you are aware of how to work independently and are not afraid of a challenge or responsibility.

Your nationality and background are irrelevant. Our corporate language is English. For us, it is just important that you are interested in learning and have knowledge of PHP, SQL, React, CSS, and JavaScript, as well as other relevant programming languages.

## **Internship Program:**

The internship is an unpaid full-time position for a minimum of 3 months. The internship period starts in autumn 2024 or winter 2025. We are flexible regarding the start date.

During your internship, you will be assigned a mentor who will help you get started with a thorough onboarding process. You will be attached to a team of developers. We take our internship program seriously and use it for recruitment, so there may be an opportunity for permanent employment after completing the internship.

## **The specific programs you will work with include:**

React, SQL, CSS, JavaScript, jQuery, PHP, Python, Docker, Git, and BitBucket.

Send your application to [job@bliksund.com](mailto:job@bliksund.com) and write 'Internship Bliksund DK' in the email subject. If you have any questions about the internship program, please contact [soren.hjortdal@bliksund.com](mailto:soren.hjortdal@bliksund.com)
